About the Farm

The GERA Estate is located in the Djimma region of Ethiopia at altitudes over 2,000 meters above sea level. This altitude combined with the nitrogen-rich plants and natural fertilizers used on the estate provide excellent growing conditions for specialty coffee. No chemical fertilizers or insecticides are used; production at GERA focuses on sustainability and good working conditions for its employees. The GERA Estate provides housing, childcare and education, clean drinking water, electricity, healthcare, and recreational facilities for all of its employees free of charge.
