## About the Farm

The Los Volcanes brand represents the world-renowned Antigua coffee region and has been a standard in the industry since 1952. This regional blend is named after the 3 volcanoes that surround the Antigua Valley (Agua, Fuego, Acatenango) and overlook the patios where it is processed.

This coffee is grown by some of the top farms and small producers in the Antigua region including the area of Ciudad Vieja and the volcanic valley. The soil in this region is rich in minerals, nutrients and sediments which are ideal for growing unique and outstanding coffee. The milling and drying processes are strictly and carefully executed, yielding consistent quality year after year.
